About Ai-Finance:

In order for investors to earn income from the sale of our electricity, we enter into contracts for the supply of energy with territorial power companies. Thanks to this, our investors receive guaranteed income from the sale of produced electricity. We also plan to use the funds to research new technologies and develop more efficient solar panels. More thorough research and development will allow us to improve energy production, which in turn will lead to increased income for our investors. Thus, the company receives investments and improves the platform, while providing clean and sustainable energy.

Referral program

We take pride in offering our investors a profitable marketing plan that ensures a stable income. In addition to investments, we offer our investors the opportunity to earn additional income through our referral program, which has 3 levels: **5-2-1%**. Our marketing plan provides a guaranteed income that is not dependent on market fluctuations. We strive for long-term relationships with our investors and partners, and we are always ready to offer new opportunities and favorable conditions.
